

We Care About the Environment.

DO YOU?

A new technological revolution is now making it possible for you to contribute to a greener world.

N9 Pure Silver™ is a next generation, silver-based antibacterial that effectively guards against microbial activity and associated malodours on textiles.

Garments treated with **N9 Pure Silver™** remain fresh for longer, requiring less frequent washing, thereby prolonging the life of the garment and conserving water.

N9 Pure Silver™'s non-leaching property ensures that it is extremely safe for the skin and the environment. Look out for the **N9 Pure Silver™** tag and help save the environment with every wear!

Make sure your next buy is a smart one.
